

## Analytical Navigator Controller

The Analytical Navigator Controller is used along with a Master Controller to direct the samples to multiple analytical destinations. The Analytical Navigator can connect to up to four analytical devices. This includes the Gilson GX-271 liquid handler, the Waters Patrol UPLC, the MAST Cell Removal System, and the Nova BioProfile Flex. More systems like the Roche Bio HT and Roche CEDEX HiRes have been explored for use and proven compatible with the system. The purpose of the Analytical Navigator Controller is to get the samples to arrive at the different destinations you need and facilitate communications and data integrity.

### FEATURES

- Routes sample(s) to up to 4 specified destinations
- Communicates with analytical devices to coordinate automated analysis and maintain data integrity
- LED lights match system status
- Stackable and compact
- Extremely durable and robust
- Little to no maintenance required

### SPECIFICATIONS

#### Measurements:

- Width: 15 in.
- Height: 7 in.
- Depth: 13 in. (Includes needed clearance)
- Weight: 21.2 lbs.

#### Utilities and/or Components Required:

- Compressed Air Supply: 70-100 PSI
- 120 VAC, 0.5 A
- Analytical Navigator Valve Manifold Assembly
- Master Controller
