

Nova Direct Delivery Module

The Nova Direct Delivery Module is an attachment that allows sample to be directly delivered to the Nova without user involvement. It controls the handoff between the MAST system and Nova. It can be moved out of the way so it does not interfere with at-line manual sampling.

FEATURES

- Moves sample into the Nova from the MAST system
- Can be moved out of the way for manual sampling
- Operates without user interaction
- Small and durable

SPECIFICATIONS

Measurements:

- Width: 3.0 in. (Max.)
- Height: 5.5 in. (Max.)
- Depth: 2 in. (Max.)
- Weight: 1.6 Lbs. (Empty)

Utilities and/or Components Required:

- Connection to MAST System
- Nova BioProfile FLEX
