

Sample Navigator Controller

The Sample Navigator Controller is used along with a Master Controller to coordinate five different Sample Pilots (of either type SP100 or SP200). Two Sample Navigator Controllers can be present in one system, managing up to ten bioreactors. This controller directs the actions of a separate device, the Sample Navigator, which physically routes samples from the different bioreactors. The Sample Navigator Controller must communicate with the Master Controller and cannot operate on its own. The Sample Navigator Controller coordinates the samples so they can eventually be distributed to specified destinations.

FEATURES

- Routes samples for up to 5 Sample Pilots
- 2 Sample Navigator Controllers can operate in one system to accommodate up to 10 bioreactors
- LED lights match system status
- Stackable and compact
- Extremely durable and robust
- Little to no maintenance required

SPECIFICATIONS

Measurements:

- Width: 15 in.
- Height: 7 in.
- Depth: 13 in. (Includes needed clearance)
- Weight: 26.6 lbs.

Utilities and/or Components Required:

- Compressed Air Supply: 70-100 PSI
- 120 VAC, 0.5 A
- Sample Navigator
- Master Controller
